

Year	Unit	Substantive Knowledge Progression	Disciplinary Knowledge Progression	Case Studies	Challenge
EYFS	Our School	I know and can talk about members of my immediate family and community. I know how to find information from a simple map. I know some of the places that are special to members of my community. I know some environments that are different from the one in which I live. I know how to draw a simple map of the journey from home to school.	Draw simple maps and plans of the school and journeys. Compare and describe houses in the locality. Fieldwork Undertake field work –field and short walk. Follow a route around the school building.	Our school building and outside area	Draw maps of the journey from home to school with local landmarks included.
EYFS	World/ People and Communities- UK and Africa	I know about members of my immediate family and community. I know how to draw information from a simple map. I know that that some places are special to members of my community. I know that some environments are different from the one in which I live. I know and can name some of the countries of the UK.	Take part in enquiry process Make maps Locate some seaside towns Draw a map of the Bobo Road and landmarks. Compare and describe life in Africa to life in the UK, including homes.	Homes and cultures The Bobo Road, Burkina Faso, Africa (important road, to take people to the Bobo markets).	Explain similarities and differences with our local area.
EYFS	World/ People and Communities- Land and Sea	I know how to find information from a simple map. I know and can describe some environments that are different from the one in which I live. I know some important processes and changes in the natural world around me. I know the names of some oceans.	Take part in enquiry process Make maps Compare rivers and lakes. Describe land and sea using new vocabulary. Become more familiar with a compass and direction Use stories to help understand and make sense of different places.	UK – land and sea	Find the North Sea, Irish Sea and Atlantic Ocean on a map.

1	Our school within Newton-le- Willows	I know the difference between rural and urban areas, including my own area. I know how to use fieldwork to identify and record the main features of the school grounds. I know how to use fieldwork to identify and record the main features of the local area. I know how to use data collected during fieldwork and recount the journey through the local area. I know how to recognise some commonly used	Use maps at different scales to find the Newton-le-Willows, school, their home. Draw journeys taken during fieldwork including landmarks they pass. Use locational language to describe the location of points on a map of the school/local area. Take digital photographs of the main features of the school and plot them on to a map to show the route round the school	Our school in Newton-le- Willows	Name key features associated with a town or village, e.g. factory, detached house, semi- detached
		Ordnance Survey map symbols. I know how to create a map of our local area, showing the key features.	Make an aerial plan/map of the school using blocks Fieldwork Use simple fieldwork and observational skills to study the geography of their school and its grounds Ask simple questions about the local area.		house, terrace house.
1	North and South Poles	I know some hot and cold places and can locate them on a map. I know the location of the Arctic and Antarctica. I know how to explore a cold place- Antarctica. I know and can identify the animals that live in cold places and recognise how they adapt. I know about some famous Polar explorers. I know how to compare a pack list for a trip to a hot place with a list for a cold place.	Use compass directions (NESW), locational and directional language Make comparisons between features of different places Use maps, globes and digital mapping to locate places. Label diagrams/photographs using some geographical words and symbols. Investigate explorers of the Polar regions through stories.	Arctic and Antarctic polar regions	Answer questions about the climate using a chart or graph.

Seaside Seaside I know and can identify the countries of the United Kingdom. I know where Newton-le-Willows is on a map of the U.K. I know how to investigate a seaside town and list some human and physical features. I know how to create a journey map including human and physical features. I know how to create a journey map including human and physical features. I know why people would choose to visit Southport. I know how to compare different places. I know how to be photographs to investigate human and physical features of the seaside. Use maps to follow routes. Use arial photographs to find landmarks within settlements and make comparisons. Ask searching questions – Why live in Newton-le-Willows? Give opinions about places with reasons based on knowledge learned. Use simple fieldwork and observational skills to study the geography of the local area and the key human and physical features of its surrounding region Use simple fieldwork and observational language. 		I know how humans can have an impact on			
		rainforests			
		I know how to describe and explain the impact of			
		the deforestation of the rainforest.			

5	Europe	I know the names and locations of a range of well-known European countries. I know the location of some major cities, mountain ranges and rivers in Europe. I know different climate zones and biomes throughout Europe. I know the countries that make up the European Union. I know how the landscape of Greece would have affected why people settled in certain locations.	Locate European countries on a map of Europe and explain how they recognise these countries. Locate some major cities, mountain ranges and rivers in Europe and add these to base maps. Analyse graphs and charts to recognise climates. Describe how some places are similar and others are different in relation to their physical features including knowledge of climate zones and biomes. Describe how some places are similar and others are different in relation to their human features	Greece – investigate reasons for settlement patterns	Begin to recognise the climate of a given country according to its location on the map.
			including collecting relevant information about places and reporting on it. Use maps, atlases and global mapping (e.g. Digimap) to explain why people settled in certain locations around Greece		
5	Mountains	I know what a mountain is and can locate the world's 'Seven Summits' on a map. I know the key features of mountains and how they are formed. I know about the climate of the mountains and can explore mountain life. I know the location of the UK's highest mountains and can show this on a map. I know the importance of the Himalayas for people living in the region. I know about a world-famous mountain or mountainous region and can explain this.	Use UK and world maps and globes to name and locate many of the world's most famous mountain regions. Use OS map symbols and topographic maps when studying UK mountains. Make sketches and plans. Explain climate and how mountains have their own climate. Give possible answers to their own geographical questions about the impact of climate change on the Himalayas. Fieldwork- Eco-Centre, Southport Extend knowledge and understanding of climate change. Investigate causes and effects of climate change and consider own environmental footprints (mitigating against future damage). Children learn how they are crucial in shaping the decisions of the future.	Himalayas	Explain what a place (open to environmental and physical change) might be like in the future taking account of physical features. Discuss ways in which humans have both improved and damaged the environment.

5	Africa	I know that Africa is a diverse continent with 54 different countries and that life in these countries differs in many ways. I know the names and locations of some of the African countries. I know the Tropic of Cancer and Capricorn and key topographical features including coast, hills, desert mountains, rivers and oceans. I know how to identify some main environmental regions, key physical and human characteristics, and major cities. I know what Fairtrade is and how it supports sustainability. I know that trade and the distribution of natural resources differs across Africa. I know that Africa is a diverse continent and I can compare different countries.	Use photographs and videos to explore the diversity of the continent. Use atlases to make a large jigsaw map of the 54 countries of Africa. Locate the Tropic of Cancer and the Tropic of Capricorn, the Sahara Desert using maps, atlases, globes and digital/computer mapping. Use 4 and 6 figure grid references. Understand the significance of latitude and longitude and make connections e.g. between the Equator and the tropics and Africa. Role play a simulation game as a banana farmer in Uganda and experience the impact that Fairtrade would have on the lives of smallholder farmers and Fairtrade co-operative farmers to answer why it is important. Explain what a place might be like in the future, taking account of issues impacting on human features and physical features e.g. climate change, Fairtrade.	Fairtrade e.g. banana plantations in Uganda Compare and contrast African countries to avoid the 'single story' of Africa.	Plan a journey to a place in another part of the world, taking account of distance and time and work out an accurate itinerary.
6	North America	I know how to locate the USA and Canada on a map. I know how to confidently explain scale and use maps with a range of scales. I know the location of the Tropics or Cancer and Capricorn and the Arctic and Antarctic circles. I know some of the key physical and human characteristics about places across the U.S.A. I know how to investigate case studies of chosen places in the U.S.A. including the human, physical and environmental features. I know that tourism can affect places and can explain the possible impact of this. In terms of environmental geography, I know how humans and nature interact in space and place.	Accurately use 4 and 6 figure grid references. Use maps at a range of scales to investigate places. Use maps, atlases, globes and digital mapping. Predict climate based on the information provided e.g. tropics, latitude. Research information using primary sources e.g. population data and secondary sources e.g. directed websites, information. Use maps to compare countries in terms of scale. Ask and answer enquiry questions related to a place. Debate an issue giving reasoned justifications.	Rockies/ Mount St. Helens	Analyse population data on two settlements and report on findings and questions raised. Name the main lines of latitude and meridian of longitude.

6	What's in the News? Current issues and implications	I know how and why landscapes can change over time. I know the causes and effects of some environmental issues around the world for people, animals and environments. I know about how landscapes can change over time using maps, photographs and charts to analyse these changes. I know the impact that humans can have on our environment. I know and can explain the UN's 2019 global goals. I know how to recognise consequences for the future and reach informed solutions based on the case studies discussed. I know what sustainability is and the actions that I make in my own life.	Use O.S. maps and symbols to answer questions. Use maps, aerial photos, plans and web resources to describe what a locality might be like and how it has changed. Map land use with own criteria to answer geographical questions. Reach reasoned and informed solutions and discuss the consequences for the future.	Flooding- Tewkesbury/Su dan Indian Ocean earthquake and tsunami Other current issues	Explain how human activity has caused an environment to change. Recognise and explain the term sustainable development and use it in different contexts.
6	Rivers	I know how to describe the water cycle, explain what a river is and locate the world's longest rivers on a map. I know and can explain why water is such a valuable commodity. I know how to describe how rivers are used around the world. I know and can explain why many cities of the world are situated by rivers. I know the stages and features of a river, and the way that land used changes from the source to the mouth. I know and can explain how human activity affects rivers. I know and can explain how flooding affects communities. I know the key characteristics of one of the world's longest rivers.	Define geographical questions to guide research. Use a range of self-selected resources to answer questions. Fieldwork Visit a river, locate and explain the features and process. Make field notes/observational notes about land features. Use OS maps/symbols (1:10,000 and 1:25,000). Use the language of rivers to explain processes e.g. erosion, deposition, transportation. Create sketch maps when carrying out a field study.	Three Gorges Dam, Yichang, China River Alt, Merseyside	Define geographical questions to guide their research. Use a range of self-selected resources to answer questions.
